

# One Less Crochet

## Company Overview:

At One Less Crochet, we believe in the power of creativity and craftsmanship, and we're on a mission to make the world a better place, one stitch at a time. Our carefully curated selection of crochet products showcases the finest and most eco-friendly materials available. From organic cotton and bamboo yarns to recycled fibers, we are committed to reducing our carbon footprint and promoting eco-conscious choices in the crafting community.

- **Craft ID:** A unique identifier assigned to every "Craft" product for inventory and tracking purposes.
- **Craft Name:** The name or title given to the specific "Craft" product, helping customers easily identify and refer to it.
- **Selling Price:** The retail price at which the "Craft" product is offered to customers.
- **Manufacturing Cost:** The total cost incurred during the production of the "Craft" item, including materials, labor, and other production expenses.
- **Size:** The dimensions or measurements of the "Craft" product, providing customers with information about its physical size.
- **Color:** The color or color variants available for the "Craft" product, allowing customers to select their preferred option.
- **Type:** The size variations available for the "Craft" product. The values can be XS, S, M, L, and XL, indicating different size options suitable for various crafting projects.
- **Fit:** If applicable, the "Fit" attribute indicates the compatibility of the "Craft" product with specific crafting materials or other accessories.
- **Description:** A detailed and engaging description of the "Craft" product, highlighting its features, benefits, and eco-friendly nature. This description would entice customers to choose "Craft" and provide essential information about its use and purpose in crafting projects.

By carefully defining these attributes for the "Craft" product, One Less Craft can efficiently manage its inventory, assist customers in making informed decisions, and showcase the product's unique selling points, ultimately enhancing the overall customer experience.

Product: **Crafts**

Product Attributes:

Attributes	Sample Data
Craft ID	100001
Craft Name	Cushion Macrame
Selling Price	43.97
Manufacturing Cost	15.64
Size	M
Color	Beige
Type	Macrame
Fit	Null
Description	This beautiful woven cushion is ideal to add some boho chic to your home. Tied using our most sustainable, recycled cotton yarn Nova Vita 4 in a calming neutral cream shade.

# Entity Relationship Diagram

## Many To Many Relationships

## Entity Relationship Diagram (Many to Many relationships resolved)

## ERD Language

Each EMPLOYEE *must* work for zero or one DEPARTMENT.

Each DEPARTMENT *may* employee zero, one or more EMPLOYEEs.

Each EMPLOYEE *may* supervise zero or one DEPARTMENT.

Each DEPARTMENT *may* be supervised by zero or one EMPLOYEE.

Each EMPLOYEE (Mgr. role) may supervise zero, one or more EMPLOYEEs (Emp role).

Each EMPLOYEE (Emp role) may be supervised by zero or one EMPLOYEE (Mgr. role).

Each EMPLOYEE *must* work for one and only one STORE.

Each STORE *must* employee one or more EMPLOYEEs.

Each EMPLOYEE *may* supervise one and only one STORE.

Each STORE may be supervised by one and only one EMPLOYEE.

Each EMPLOYEE may be included in zero, one or more ORDERS.  
Each ORDER must have one and only one EMPLOYEE.  
Each EMPLOYEE may hold one and only one JOB.  
Each JOB may be held by zero, one or more EMPLOYEES.  
Each EMPLOYEE may serve zero, one or more CUSTOMERS.  
Each CUSTOMER may be served by zero or one EMPLOYEE.  
Each CUSTOMER must have one and only one ZIP.  
Each CUSTOMER may prefer zero or one CRAFT.  
Each CRAFT may be preferred by zero, one or more CUSTOMERS.  
Each ZIP may belong to zero, one or more CUSTOMERS.  
Each ZIP may belong to zero, one or more WAREHOUSEs.  
Each WAREHOUSE must have one and only one ZIP.  
Each ZIP may belong to zero, one or more STOREs.  
Each STORE must have one and only one ZIP.  
Each CUSTOMER may be included in zero, one or more ORDERS.  
Each ORDER must have one and only one CUSTOMER.

Each ORDER may have zero, one or more ORDER\_CRAFTs.  
Each ORDER\_CRAFT must be for one and only one ORDER.  
Each CRAFT may have zero, one or more ORDER\_CRAFTs.  
Each ORDER\_CRAFT must be for one and only one CRAFT.

Each CRAFT may have zero, one or more CRAFT\_YARNs.  
Each CRAFT\_YARN must be for one and only one CRAFT.  
Each YARN may have zero, one or more CRAFT\_YARNs.  
Each CRAFT\_YARN must be for one and only one YARN.

Each CRAFT may have zero, one or more INVENTORYs.  
Each INVENTORY must be for one and only one CRAFT.  
Each WAREHOUSE may have zero, one or more INVENTORYs.  
Each INVENTORY must be for one and only one WAREHOUSE.

Each WAREHOUSE may have zero one or more WAREHOUSE\_STOREs.  
Each WAREHOUSE\_STORE must be for one and only one WAREHOUSE.  
Each STORE may have zero one or more WAREHOUSE\_STOREs.  
Each WAREHOUSE\_STORE must be for one and only one STORE.

Each YARN may be supplied by zero, one or more YARN\_SUPPLIERs.  
Each YARN\_SUPPLIER must be for one and only one YARN.  
Each SUPPLIER may be supply zero, one or more YARN\_SUPPLIER.  
Each YARN\_SUPPLIER must be for one and only one SUPPLIER.

## SQL Statements

1. Retrieve the CUSTOMERS that live in Toronto, over 18 years old and have purchased a total amount greater than or equal to 10 dollars.

```
CREATE OR REPLACE VIEW promotion_in_mississauga AS
SELECT cu.email - SUM(cr.selling_price)
FROM customers AS cu
      INNER JOIN orders USING (customer_id)
      INNER JOIN zips AS z USING (zip_code)
      INNER JOIN crafts_orders USING (order_id)
      INNER JOIN crafts AS cr USING (craft_id)
WHERE ((YEAR(CURRENT_DATE)) - YEAR(cu.date_of_birth) >= 18) AND (LOWER(z.city) =
'toronto')
GROUP BY cu.email
HAVING (SUM(cr.selling_price) > 10);
```

2. Retrieve the total sales amount by location of all orders for the past 6 months to know which city has sold more crafts.

```
SELECT z.city, SUM(cr.selling_price)
FROM customers
      INNER JOIN orders AS o USING (customer_id)
      INNER JOIN zips AS z USING (zip_code)
      INNER JOIN crafts_orders USING (order_id)
      INNER JOIN crafts AS cr USING (craft_id)
WHERE (TIMESTAMPDIFF(MONTH, o.order_date, CURRENT_DATE) >= 6)
GROUP BY z.city;
```

3. Create a view that shows the yarns that are mostly used by calculating the crafts ordered multiplied by the quantity of the crafts sold.

```
CREATE VIEW most_ordered_yarns AS
SELECT
  Y.yarn_id,
  Y.yarn_type,
  Y.yarn_color,
  Y.yarn_description,
  COALESCE((
    SELECT SUM(CO.quantity * CY.quantity)
    FROM crafts_orders CO
    JOIN crafts_yarns CY ON CO.craft_id = CY.craft_id
    WHERE CY.yarn_id = Y.yarn_id
  ), 'Not used yet') AS total_ordered_quantity
FROM yarns Y;
```

4. List the total sales of each employee that is Sales Representatives.

```
CREATE VIEW Employee_sales AS
SELECT
    E.employee_id,
    E.first_name,
    E.last_name,
    (
        SELECT COALESCE(SUM(CO.quantity * C.selling_price), 0)
        FROM crafts_orders CO
        JOIN crafts C ON CO.craft_id = C.craft_id
        JOIN orders O ON CO.order_id = O.order_id
        WHERE O.employee_id = E.employee_id
    ) AS total_sales_amount
FROM employees E
WHERE E.job_id = 301; -- Job IDs Sales Representatives (301)
```

5. Retrieve the customers and its favorite craft with the highest selling price.

```
CREATE OR REPLACE VIEW highest_selling_favorite_craft AS
SELECT CONCAT(c.first_name, ' ', c.last_name) AS customer_name,
       cr.craft_name AS favorite_craft,
       cr.selling_price
FROM customers c
     LEFT JOIN crafts cr ON c.favorite_craft = cr.craft_id
WHERE cr.selling_price = (SELECT MAX(selling_price) FROM crafts);
```

6. Retrieve the list of crafts along with the total quantity available in each warehouse.

```
CREATE OR REPLACE VIEW craft_total_quantity AS
SELECT c.craft_name,
       w.warehouse_name,
       COALESCE(SUM(i.quantity), 0) AS total_quantity
FROM crafts c
     CROSS JOIN warehouses w
     LEFT JOIN inventories i ON c.craft_id = i.craft_id AND w.warehouse_id =
     i.warehouse_id
GROUP BY c.craft_id, w.warehouse_id;
```

7. Retrieve how many craft items are available and how many have been ordered, helping track craft supplies.

```
CREATE VIEW CraftInventorySummary AS
SELECT c.craft_id,
       c.craft_name,
       i.quantity AS inventory_quantity,
       COALESCE(SUM(co.quantity), 0) AS total_ordered_quantity
FROM crafts c
     LEFT JOIN inventories i ON c.craft_id = i.craft_id
     LEFT JOIN crafts_orders co ON c.craft_id = co.craft_id
GROUP BY c.craft_id, c.craft_name, i.quantity;
```

8. Retrieve the list of employees with their department.

```
CREATE VIEW EmployeeDepartmentSummary AS
SELECT e.employee_id,
       e.first_name,
       e.last_name,
       d.department_id,
       d.department_name
FROM employees e
LEFT JOIN departments d ON e.department_id = d.department_id;
```

9. Retrieve the list of employees and the quantity of craft sold.

```
SELECT e.employee_id, CONCAT(e.first_name, ' ', e.last_name) AS "Full Name",
       co.quantity,
       co.craft_id
FROM employees AS e
JOIN orders AS o USING (employee_id)
JOIN crafts_orders AS co USING (order_id);
```

10. warehouse with highest capacity in a specific province

```
CREATE VIEW highest_warehouse_capacity AS
SELECT w.warehouse_id, w.warehouse_name, w.address, w.capacity, z.zip_code, z.city,
       z.province, z.country
FROM warehouses w
JOIN zips z ON w.zip_code = z.zip_code
WHERE z.province = 'Ontario'
AND w.capacity = (
    SELECT MAX(capacity)
    FROM warehouse_details
);
```

11. Retrieve warehouse details with the capacity in a specific city

```
SELECT w.warehouse_id, w.warehouse_name, w.address, w.capacity, z.zip_code, z.city,
       z.province, z.country
FROM warehouses w
JOIN zips z ON w.zip_code = z.zip_code;
WHERE city = 'Toronto';
```

12. Retrieve the number of warehouses per province

```
SELECT z.province, COUNT(w.warehouse_id) AS "Number of warehouses"
FROM warehouses AS w
INNER JOIN zips AS z USING (zip_code)
GROUP BY z.province;
```
